Dear Mr. Ketan Deshpande

FUEL,

Subject: Letter of Appreciation for Future Skill Development Implemented by FUEL and Supported by HSBC Technology

We are writing to express our sincerest gratitude and appreciation for the outstanding efforts of implementing the Future Skill Development program, powered by FUEL and supported by HSBC Technology for our college. It has proven to be invaluable in preparing students for the challenges and opportunities of the digital age. The diverse range of courses including Domain Training, Aptitude Training and employability skills reflects the dynamic nature of today's industries and fosters a deep understanding of emerging technologies and business trends. By incorporating practical training, industry-relevant projects, and mentorship opportunities, the program bridges the gap between theoretical knowledge and real-world application.

We must commend HSBC Technology and FUEL for their unwavering dedication in curating a curriculum that focuses on developing critical skills such as problem-solving, communication, teamwork, and adaptability. These competencies are not only instrumental in professional success but also foster personal growth and lifelong learning.

Once again, thank you for the unwavering commitment to student success and for providing an exceptional educational experience. We are proud to be associated and eagerly look forward to witnessing the continued growth and accomplishments of the institution.

We wish to share the list (as attachment) of the students who are placed with the intervention of Future Skill Development Program.

Wishing you all the best and look forward to longer association.

Sincerely,

Sardar Vallabhbhai Patel Birth Anniversary "National Unity Day" and "National Pledge Day"

Name of Program: Sardar Vallabhbhai Patel Birth Anniversary as a "National Unity Day"
and Shrimati Indira Gandhi assassination day as a "National Pledge Day"

Date: 31st October 2022, 2.45 pm

Venue: Office Corridor, MSS's CET, Jalna.

On Occasion: Azadi ka Amrut Mahotsav

In Association with: National Service Scheme (NSS) and Student Representative Council (SRC)

Abstract:

National Unity Day (Hindi: राष्ट्रीय एकता दिवस, romanized: **Rashtriya Ekta Diwas**, (Rāṣṭriya ēkatā divasa) is celebrated in India on 31 October. It was introduced by the Government of India in 2014. The day is celebrated to mark the birth anniversary of Sardar Vallabhbhai Patel who had a major role in the political integration of India.

The official statement for National Unity Day by the Home Ministry of India cites that the National Unity Day "will provide an opportunity to re-affirm the inherent strength and resilience of our nation to withstand the actual and potential threats to the unity, integrity, and security of our country."

On the day, a pledge is read out in our College

"I solemnly pledge that I dedicate myself to preserving the unity, integrity, and security of the nation and also strive hard to spread this message among my fellow countrymen. I take this pledge in the spirit of the unification of my country which was made possible by the vision and actions of Sardar Vallabhbhai Patel. I also solemnly resolve to make my own contribution to ensure the internal security of my country."

31 October is also celebrated as **Rashtriya Sankalp Diwas** or National Pledge Day as it marks the day of assassination of Indira Gandhi.

At this time, the Principal of College Dr.S.K. Biradar, Vice-Principal Prof.R.L. Karwande, All the head of Departments, Office Superintendent Shri.Shyam Bhojne, all faculty members, NSS Programme officer Prof. S.R. Ghungrad, NSS Volunteers, SRC members and students were present.

- IPR is collective term for Intellectual Property Rights:
- Intellectual property, very broadly, means the legal rights which result from intellectual activity in the
- Industrial,
- Scientific,
- Literary and
- Artistic fields.
- Intellectual property rights are like any other property rights. They allow creators, or owners, of patents, trademarks or copyrighted works to benefit from their own work or investment in a creation.

A Program on “Mahila Aayog Aaplya Dari”

➤ AGENDA OF THE WORKSHOP:-

• POWERS OF THE COMMISSION

The commission is a statutory body vested with powers as applicable to the Civil Court in respect of requisitioning of any public record from any Court or office, issuing orders for the examination of witnesses and documents to enforce the attendance of a person to give witnesses and before the Commission for holding an enquiry in any matter, to appoint any officer of the State or Central Government for holding a deleted enquiry into any question woman.

• THE COUNSELING AND FREE LEGAL AID CELL OF THE COMMISSION

The main focus area identified by the commission is the eradication of violence against woman. As soon as any incident related to the exploitation/molestation/atrocities against woman comes to the notice of the Commission, immediate steps are taken to intervene with the respective Government/police authority in order to ensure that proper investigations are conducted and the offenders prosecuted. A number of cases pertaining to matrimonial matters, property matters, dowry harassment, dowry deaths, rape, sexual harassment at workplace, etc. are being recorded at the commission's office. In order, to handle cases pertaining to atrocities against woman, the Commission endeavors to offer counseling services to needy woman prior to the commencement of any litigation. For this purpose, a Counseling and Free Legal Aid Center has been established in the Commission's premises at Mumbai on 18th March 1995.

The counselors of the cell analyses the problem of the woman complainant and decide on the course of action. Under section 12(2) of the Maharashtra Act No. XV of 1993, the counselors summon the concerned party against whom the complaint is and conduct joint meeting of both the parties and also other family members. Police assistance is taken in registering Criminal complaints. In order to reach the woman in distress at district and block places, the Commission has set up counseling cells and free legal aids services to needy woman; through the Zilla Parishad, Municipal Councils and Corporations. These cells are run by local NGOs recognized by the State Commission, currently there are 298 such counseling centers in the State of Maharashtra. Where required, the victim is placed in a protection institution or referred to family help agencies. She is also referred to other services including medical, Psychiatrist, educational, vocational, and other services, Free Legal Aid is also given the parties are unable to reach an settlement.

Keeping in mind the importance of rights of women, Internal Complaints Committee participated in the workshop on “Mahila Aayog Aaplya Dari” on 2.03.2023.

A Workshop on

“Health & Hygiene”

Organized by
Internal Complaints Committee,
Matsyodari Shikshan Sanstha's
College of Engineering and Technology, Jalna.

Date:- 08.03.2023

Time:- 3.00 pm to 5.00 pm

Place:- MBA Hall, MSSCET, Jalna.

A Workshop on "Health & Hygiene"

➤ AGENDA OF THE WORKSHOP:-

Gender equality is both a fundamental human right, and a solution to some of our greatest global challenges. International Women's Day (IWD) is a global holiday celebrated annually on March 8 as a focal point in the women's rights movement, bringing attention to issues such as gender equality, reproductive rights, and violence and abuse against women. Spurred on by the universal female suffrage movement, IWD originated from labor movements in North America and Europe during the early 20th century. This day celebrates the cultural, political, economic and social achievements of women. It also highlights the extraordinary roles played by women in almost every walk of life and celebrates acts of courage and determination by ordinary women.

Feminine hygiene is essential and needs to be maintained both at home and at workplaces. Looking at the statistics, the women workforce across the world contributes around 48.5%. A hygienic workplace will go a long way in creating a healthier workplace, and thereby, the chances of employees falling sick will be reduced. A healthy workforce will be more happy and productive in the workplace.

Keeping in mind the importance of good health and hygiene of women, Internal Complaints Committee organized a workshop on "Health & Hygiene" on the occasion of International Women's Day on 8.03.2023.

Date:- 7.11.2023

Time:- 11.00 am to 4.30 pm

One Day Workshop on

Self Defense

Name of Program:- One Day Workshop on Self Defense

Date:- 7.11.2023

Time:- 11.00 am to 4.30 pm

Abstract:-

Self-defense is a counter measure that involves defending the health and well-being of oneself from harm. The use of the right of self-defense as a legal justification for the use of force in times of danger is available in many jurisdictions. Physical self-defense is the use of physical force to counter an immediate threat of violence. Such force can be either armed or unarmed. In either case, the chances of success depend on various parameters, related to the severity of the threat on one hand, but also on the mental and physical preparedness of the defender.

Self-defense involves defending oneself against potential threats while also ensuring personal safety. While training teaches techniques to block attacks, it is always better to avoid them altogether. Therefore, a significant portion of self-defense training should focus on prevention. Learning self-defense is about developing the ability to stand your ground and stay composed under pressure. It is about gaining the confidence to effectively handle situations that would otherwise feel overwhelming and beyond your control.

Self-defense training can also contribute to the development of social skills. Martial arts and self-defense often emphasize values such as respect for elders and tolerance towards others. By improving these social skills, you create a positive outlook and enhance your ability to interact with others. It also promotes harmony and peace of mind. Learning self-defense plays a significant role in a student's life, enhancing their preparedness for potential threats. It contributes to their holistic development and empowers individuals to defend themselves rather than being vulnerable and defenseless. Therefore, prioritizing self-defense training is crucial for personal safety and well-being.

Workshop was arranged by Internal Complaint Committee (previously, Ladies Grievances Cell) of Matsyodari Shikshan Sanstha's College of Engineering and Technology, Jalna on 7th November, 2023.

In today's fast-paced world, where technology and global interconnectedness are advancing at an unprecedented pace, it can be easy to lose sight of what truly matters and what guides our actions. Ethics, moral values, and principles are the foundation of our lives, and they shape the way we interact with the world around us. They define who we are, what we stand for, and how we want to be remembered. They give meaning and purpose to our lives,

and they serve as a guide for our behavior. Moral values are the beliefs, customs, and practices that a society holds as important, such as honesty, integrity, fairness, respect, and responsibility. Principles are the fundamental beliefs that guide our behavior, such as justice, equality, and compassion.

In our personal and professional lives, it's important to live by these values and principles. When we do, we demonstrate our commitment to doing what is right and treating others with respect and dignity. By doing so, we build trust, create meaningful relationships and foster a sense of community.

Subject: Invitation as a Chief Guest for Inaugural ceremony of Mechanical Engineering Students Association (MESA) 2022-23.

Respected Sir,

We, Matsyodari Shikshan Sanstha's, College of Engineering & Technology, Jalna is an All India Council for Technical Education (AICTE), New Delhi approved engineering Institute and affiliated to Dr. Babasaheb Ambedkar Technological University, Lonere, providing high class infrastructure and educational facilities. Our institute is the only engineering college in district which has been started to help the economically weak students to make career in engineering fields at affordable fees. The institute has been started with social vision to develop the rural masses, which were remaining ignored from quality education in technical field.

We are pleased to invite you as a Chief Guest for Inaugural function of **Mechanical Engineering Students Association (MESA) 2021-22** on **31st May 2023 at 11.00 am** in our Institute. We would like to know the availability of your time in your busy schedule, so that we can have an appointment with yourself and make appropriate arrangements.

We look forward to a positive acknowledgement.

Thanking you.

Respected Sir,

Warm Greetings from MSS's CET, Jalna....!

Matsyodari Shikshan Sanstha is a reputed organization and has established

itself as one of the foremost educational group of institutions in Marathwada region. Matsyodari Shikshan Sanstha having an Engineering College at Jalna. As a part of academic curriculum of Final Year Mechanical Engineering students, Our college wants to arrange an INDUSTRIAL VISIT at your Esteemed organisation to enhance Practical Exposure & Skills of students. We have planned 46 Students along with 02 Faculty members to visit your institute on 25/05/2022

Thanking you....

With Regards...

Introduction

The college has arranged Industrial visit for final year engineering students to study Cold Storage process. The visit was organized with the prior permission and guidance of HON. Principal Dr. S. K. Biradar and Head of Mechanical Engineering Department, Prof. R. L. Karwande.

Industrial visit is a vital part of curriculum. It bridges classroom learning and real working worlds. The visit provides knowledge about the organizational structures and modes of operation in different industries.

OBJECTIVES OF INDUSTRIAL VISIT

- 1) To Know the Information about physical set up of Industry.
- 2) To understand the working of Cold Storage
- 3) Knowing about Compressors, Condensers, Intercooler & other components of refrigeration system.

About RCS

Rajureshwar Cold Storage has capacity of 28000 metric tons. It has 11 cold storage rooms. All types of food grains, spices, eatables are stored here .It works on Ammonia Vapour Absorption System. It has two compressors with Inter cooling.

Conclusion of a very fruitful visit to Rajureshwar Cold Storage

The visit was fruitful, and would help us in connecting the theoretical study in class with the practical applications of various tooling and machining processes used in industry. The visit also motivated us in many ways. We are excited to have more such industrial visits, field visits, internships, taking industrial projects, and take more of practical works including workshops on various concepts. Overall, we got a new viewpoint of approaching the same problem, and an experience we won't forget for their lifetime. We also have got some very exciting new ideas for the projects we are going to prepare in future based on various concepts, loopholes existing in the concepts, new and a fine-tuned approach for the same thing and the likes.

Introduction

The college has arranged an Industrial visit for third year engineering students to study jig and fixtures, press tools, forging die, and injection moulds. The visit was organized with the prior permission and guidance of Hon. Principal Dr. S. K. Biradar and Head of Mechanical Engineering Department, Prof. R. L. Karwande.

Industrial visit is a vital part of curriculum. It bridges classroom learning and real working worlds. The visit provides knowledge about the organizational structures and modes of operation in different industries.

Our visit was divided into two Sessions. In the first Session of our visit, we went to Marathwada Auto Cluster, Chh. Sambhajinagar, while in the latter we visited IGTR Chh. Sambhajinagar.

OBJECTIVES OF INDUSTRIAL VISIT

- 1) To Know the Information about physical set up of Industry.
- 2) to understand the Press tool work/ tool room
- 3) Knowing about CNC/CAM and CAE centers.
- 4) To understand various moulding process.
- 5) CNC operated machining and programming.
- 6) Information about hydraulics, pneumatics and maintenance lab.
- 7) Practical application of tool's for making various parts.

Prologue

As the students got themselves comfortable in the buses after signing the undertakings, the bus, at 10:00 AM left the college premises and followed its path towards Chh. Sambhajinagar to our first destination, Marathwada Auto Cluster, Chh. Sambhajinagar.

About Marathwada Auto Cluster

- Marathwada Auto Cluster is an IIUS Project supported by Ministry of Commerce & Industry, Govt. Of India & Govt. Of Maharashtra
- Initiated by Chamber Of Marathwada Industries and Agriculture (CMIA), Aurangabad.
- This is Section 8, earlier sec 25 Company with Public Private Partnership approach.
- No dividend to directors/members
- It is registered under 80 G (5) (VI) of IT Act, 1961

Our Vision

To develop a Common Facility Centre that supports the growth of MSMEs in the region and helps them to achieve manufacturing excellence & ensuring sustainable growth through collective wisdom

Our Mission

To empower all the MSMEs in the region by providing them manufacturing services and skill development.

Our Objective

The objective of the project is to establish a state of the art Common Infrastructure Facility at Waluj Industrial area in Aurangabad, in order to improve the global competitiveness of the industrial units in Marathwada, through manufacturing excellence and ensuring sustainable growth through collective wisdom and result oriented efforts.

Departments and Classification of process

We Visited Following IGTR departments at IGTR.

- 1) Production Department
- 2) Tool room

Press Working

Press working may be defined as chip less manufacturing process by which various components are made from sheet metal. This process is also termed as cold stamping. The sheet metal operation done on a press may be into two categories, cutting operation and forming operations. In cutting operations, the work piece is stressed beyond ultimate strength.

These operations

- 1) Blanking
- 2) Punching
- 3) Notching
- 4) Deforming
- 5) Trimming
- 6) Shaving
- 7) Slitting
- 8) Lancing
- 9) Nibbling

Forming operations

- 1) Bending
- 2) Drawing
- 3) Squeezing

Applications:

- 1) To make Automobile parts, Gears, Brakes, Clutch plates etc.
- 2) Parts make by sheet metal working, car body parts.

Moulding

- Mould is defined as a cavity in which molten metal is poured and allowed it to cool so as to product. Such cavity may be formed with the help of pattern. The process of making mould is known as moulding.
- A pattern of making mould is known as moulding.
- A pattern is having its shape and size approximately similar to that of the desired component. Moulding is the process of making a mould.
- Moulds are normally made from heat resisting materials like sand and clay.
- Sand is widely used mould material for casting ferrous and non-ferrous materials.

Non-Conventional Machines

CNC Machine is the Machine tool which is operated and controlled by using dedicated computers is known as computerized numerical control machine. In CNC system, most of the hardware function modules of NC are replaced by a stored program in computer. Software stored in computer performs the functions of data decoding, control, buffering, feed rare control etc.CNC machine tools are widely used due to many new control features available on these machines.

Specification of CNC

M/C Type: LT-2 LM500

M/C Number: 280

Year: 2016

Supply voltage: 380V/415V ,3PEN, 50Hz

Control volt: 24V.Dc

Back up fuse: 63Amps.

Rated current: 33/3/Amps

CVA Rating: 22Kva

Size of wire: 10sqmm.

Features of CNC Machines

- 1) The part program can be input to the controller unit through key board or the paper tape can be read by reader in the control unit.
- 2) The part program once entered into the computer memory can be used again and again.
- 3) The input information can be reproduced with use of spatial sub programs developed for repetitive machining sequences.
- 4) The control system can provide the information such as number of components produced, cycle time of components, job setting time, time for repair and diagnosis etc.

Advantages of CNC Machines

- 1) Reduced lead time
- 2) Elimination of operator error
- 3) Lower labour cost
- 4) High accuracy
- 5) Elimination of jig and fixture
- 6) Flexibility
- 7) Reduced inspection
- 8) Less scrap

Disadvantages of CNC Machine

- 1) Higher investment cost
- 2) Higher maintenance cost
- 3) Costlier CNC personnel
- 4) Planned support facility

Application area of CNC Machine

- 1) When operations are very complex.
- 2) The numbers of operation per component are large.
- 3) Batch size is medium.
- 4) Batches are often repeated.
- 5) When design changes or Individual variation are required on parts.
- 6) A large variety of components is produced.

- 7) The components required high skilled operator.
- 8) Components required sub satirical tooling.
- 9) Components are critical and require 100% Inspection.

Wire-cut EDM

Introduction of wire-cut EDM

In wire-cut EDM the electrode consists of thin wire. As the material removal is obtained through the continuously feed of wire in the work piece, the process is called as wire-cut EDM. This process is used for machining sheet metal dies, Extrusion dies and prototype part. It is relatively slow process (linear travel of the order of 100mm /hour) utilizing computer controlled machines.

Principle of Wire-cut EDM

1. It works on the principle of spark Erosion occurred due to electrical and thermal energy.
2. As the cutting tool is in the form of thin wire of diameter 0.05 to 0.25mm the wire of Allowed to pass through a predrilled hole in the work piece.
3. The Electrode wire made of copper or brass.
4. The wire is inserted in the drilled slot initially and moves part of work piece at the speed of 3m/min.

Control Parameters of Wire-cut EDM

- Discharge current
- Duration of pulse
- Frequency of pulse
- Wire diameter
- Wire tension
- Dielectric flow

Advantages of EDM

- Forming electrode of product shape is not required.
- Negligible wear of Electrode

- Machined surface are smooth
- High accuracy of geometrical and dimensions
- No tapering overcut
- No need of storage of tool
- High utilization of machine
- Low operating skills

Disadvantages of Wire-cut EDM

- The wire cut EDM machine is more expensive than other machines.
- High skill are required to handle the machine when programming facility is not available
- Only conductors work piece can be machined
- It has slow material removal rate
- Less flexible compared to other machines.

Applications of WIRE-CUT EDM

- Production of prototypes
- Small series of spare parts, turbine blades, aerospace parts etc.
- Stamping dies, drawing and Extrusion tools, molding dies.
- Sintering dies, blanking dies, spark erosion, electrodes.

Profile

Central Institute of plastic engineering and technology (CIPET) was established in 1968 by Government of INDIA with the assistance of United Nations Development Programme (UNDP) at Chennai. Today CIPET is a premier national institution under the aegis of Ministry of Chemicals and Fertilizers, Government of India fully devoted to skill development, Technology Support Services, Academic and Research (STAR). CIPET operates on hub and spokes model with 28 locations – 5 High Learning Centre, 12 Other learning Centre, 3 Specialized Centre, 2 R&D Wings, 5 Vocational training Centre, 1 of Polymer and Allied Industries. 11 more centre are in process of establishment. CIPET has been accredited with ISO 9001:2008 QMS, ISO/IEC – 17025, ISO/IEC – 17020 certification on Design, Development and Conduct of specialized training courses in Plastics Engineering and Technology and rendering technical/consultancy services in design, tooling, plastics processing and testing for the benefit of plastics and allied industry. Besides, STAR activities, CIPET also plays pivotal role in generating employment opportunities especially for unemployed and underemployed youth, promoting entrepreneurs through various skill development and training programs.

About CIPET – Aurangabad

CIPET Centre at Aurangabad (Maharashtra) was established in the year 2006 and started functioning from its permanent campus spread over an area of 8.5 acres with effect from January 2011. CIPET Aurangabad is committed to provide state of the art technical services to plastics and allied industries of the State and to provide quality education to the students undergoing training in the institute creating technically qualified manpower to meet the requirement of industries at various levels.

Facilities at CIPET

The institute has various Functional and Support areas such as:

- Administrative block
- Tool Room
- Plastics Processing Workshop
- Plastics Testing Laboratories
- Plastics Mould Design Laboratories
- CAD/CAM/CAE Centre
- Hydraulics, Pneumatics and Maintenance Lab
- Fully furnished library
- Digital Library with E-Journals and Technical Videos
- Fully furnished class Rooms With Multimedia facility
- Conference Hall
- Video Conference Hall
- Fully furnished Hostel for 300 Boys and 100 Girls

Our visit to CIPET

We entered CIPET at 03:45 PM. Mobiles were not allowed and had to be switched off. We were not allowed to capture any images.

After entering CIPET we were taken to classroom, where we got seated and the faculty at CIPET introduced themselves and gave us some information about CIPET, plastics moulding, injection moulding, etc. and briefed us with what are we going to see during our visit. We were given to fill a training form, which we submitted to the CIPET faculty. Our class was divided into two groups, with 32 students in each group, and each group was going to visit the following lab departments at CIPET.

Group Photograph of Students along with Faculty Members at CIPET

Processing Department

In Processing Department, various Plastic Moulding and production facilities were present and manufacturing for their vendors. On the other side of the Processing department, a group of students were receiving training on plastic processing technology. All the college chores and teaching took place in day time. Most of the manufacturing work was done during night shifts.

Our instructor, the CIPET faculty, briefed us with some basic information on injection moulding and blow moulding before we set off to see an injection moulding machine.

Injection molding is the most commonly used manufacturing process for the fabrication of plastic parts. A wide variety of products are manufactured using injection molding, which vary greatly in their size, complexity, and application. The injection molding process requires the use of an injection molding machine, raw plastic material, and a mold. The plastic is melted in the injection molding machine and then injected into the mold, where it cools and solidifies into the final part.

The **blow moulding** process, in comparison with injection moulding, is a low pressure process with typical blow air pressures around 25 to 150 psi.

The first machine that we saw was a microprocessor controlled injection moulding. Its specifications were:

CF - 200T

Model - Sigma 200

CS - 500 mm

Max. Daylight - 1210 mm

Mould Height (min/max) - 300/710

Pattern size - 805x842

Distance Between Tie Bars - 95 mm/max

Ejector stroke - 130 mm/max

Min. mould area - 1180 cm²

Shot Capacity - 468 g

Injection Pressure - 1900 bar

Injection Rate - 246 cc/s

Injection screw rate - 250 mm

Screw Diameter - 50 mm

Various components of the injection moulding machine were:- Injection unit, screw, compressor, cutting zone, clamping system, toggle, LVDT, Limit Switches, etc.

We then set off to see another injection moulding machine which was continuously manufacturing plastic components. These plastic components were dipped in water for cooling. To these components, runners were attached which were scrapped by hand to be recycled.

Then we saw a film extrusion machine.

The equipment used in blown film extrusion is shown below. The method of making blown film distinguishes the process from other extrusion methods. The unique features about a blown film

extrusion line are the die, the method of cooling the film, the collapsing tower, and the film winder.

Image Courtesy : www.eastman.com

Air is introduced thru a hole in the center of the die to blow up the tube like a balloon. A high speed air ring mounted on top of the die blows into the hot film to cool it. The collapsing frame takes the bubble and collapses the tubular film before it is pulled through the nip rolls. The tube is flattened to create what is known as a "lay-flat" tube. The lay flat tube is taken back down the extrusion town via idler rolls. The film is either kept as such or the edges are slit off to produce two flat film sheets and wound into reels.

The next process that we saw was Extrusion blow molding.

Blow Molding (BM) process makes it possible to yield molded products economically, in unlimited quantities, with virtually no finishing required. There are basically four types of blow molding used in the production of plastic jugs, bottles and jars. These four types are Extrusion blow molding, Injection blow molding, Stretch blow molding, Reheat and blow molding.

Extrusion blow molding is simplest type of blow molding, where a hot tube of plastic material is dropped from an extruder and captured in water cooled mold. Once the molds are closed, air is passed through the top or the neck of the container; just as if one were blowing up a balloon.

BLOW MOLDING PROCESS

After seeing the proper functioning of the plastic manufacturing machines, we went to the classroom, before another instructor joined us to take us to the tool room.

In the tool room the first machine that we saw was a radial drilling machine. We also saw cylindrical grinders, universal tool and cutter grinders, surface grinders, BFW Vertical milling machine, a pantograph, and various lathe machines.

After seeing all the above machines, we ventured into the CNC section of the tool room, where we saw some unconventional type manufacturing machines.

We saw a CNC EDM machine (Electronica). Its specifications were:

Max. table movement (x*y*z) - 300*200*250

Table dimensions - 550 * 350

Max. job weight - 300 kg

Min job weight - 70 kg

Courses offered by CIPET Aurangabad

Following AICTE approved Long term academic programmes are offered at the institute:

1.) PG Diploma Program

- PG Diploma in Plastics Processing and Testing
- PG diploma in Plastics Testing and Quality Control

2.) Post Diploma Program

- Post diploma in Plastics Mould Design With CAD/CAM

3.) Diploma Programs

- Diploma in Plastics Technology
- Diploma in Plastics Mould Technology

CIPET also offers various short term courses for vocational training

Conclusion of a very fruitful visit to CIPET

The visit was fruitful, and would help us in connecting the theoretical study in class with the practical applications of various tooling and machining processes used in industry. The visit also motivated us in many ways. We are excited to have more such industrial visits, field visits, internships, taking industrial projects, and take more of practical works including workshops on various concepts. - Sand is widely used mould material for casting ferrous and non-ferrous materials.

Non-Conventional Machines

CNC Machine is the Machine tool which is operated and controlled by using dedicated computers is known as computerized numerical control machine. In CNC system, most of the hardware function modules of NC are replaced by a stored program in computer. Software stored in computer performs the functions of data decoding, control, buffering, feed rare control etc.CNC machine tools are widely used due to many new control features available on these machines.

Specification of CNC

M/C Type: LT-2 LM500
M/C Number: 280
Year: 2016
Supply voltage: 380V/415V ,3PEN, 50Hz
Control volt: 24V.Dc
Back up fuse: 63Amps.
Rated current: 33/3/Amps
CVA Rating: 22Kva
Size of wire: 10sqmm.

Features of CNC Machines

- 1) The part program can be Input to the controller unit through key board or the paper tape can be read by reader in the control unit.
- 2) The part program once entered into the computer memory can be used again and again.
- 3) The input information can be reproduced with use of spatial sub programs developed for repetitive machining sequences.
- 4) The control system can provide the information such as number of components produced, cycle time of components, job setting time, time for repair and diagnosis etc.

Advantages of CNC Machines

- 1) Reduced lead time
- 2) Elimination of operator error
- 3) Lower labour cost
- 4) High accuracy
- 5) Elimination of jig and fixture
- 6) Flexibility
- 7) Reduced inspection
- 8) Less scrap

Disadvantages of CNC Machine

- 1) Higher investment cost
- 2) Higher maintenance cost
- 3) Costlier CNC personnel
- 4) Planned support facility

Application area of CNC Machine

- 1) When operations are very complex.
- 2) The numbers of operation per component are large.
- 3) Batch size is medium.
- 4) Batches are often repeated.
- 5) When design changes or Individual variation are required on parts.
- 6) A large variety of components is produced.
- 7) The components required high skilled operator.
- 8) Components required sub satirical tooling.
- 9) Components are critical and require 100% Inspection.

Wire-cut EDM

Introduction of wire-cut EDM

In wire-cut EDM the electrode consists of thin wire. As the material removal is obtained through the continuously feed of wire in the work piece, the process is called as wire-cut EDM. This process is used for machining sheet metal dies, Extrusion dies and prototype part. It is relatively slow process (linear travel of the order of 100mm /hour) utilizing computer controlled machines.

Principle of Wire-cut EDM

1. It works on the principle of spark Erosion occurred due to electrical and thermal energy.
2. As the cutting tool is in the form of thin wire of diameter 0.05 to 0.25mm the wire of Allowed to pass through a predrilled hole in the work piece.
3. The Electrode wire made of copper or brass.
4. The wire is inserted in the drilled slot initially and moves part of work piece at the speed of 3m/min.

Control Parameters of Wire-cut EDM

- Discharge current
- Duration of pulse
- Frequency of pulse
- Wire diameter
- Wire tension
- Dielectric flow

Advantages of EDM

- Forming electrode of product shape is not required.
- Negligible wear of Electrode
- Machined surface are smooth
- High accuracy of geometrical and dimensions
- No tapering overcut
- No need of storage of tool
- High utilization of machine
- Low operating skills

Disadvantages of Wire-cut EDM

- The wire cut EDM machine is more expensive than other machines.
- High skill are required to handle the machine when programming facility is not available
- Only conductors work piece can be machined
- It has slow material removal rate
- Less flexible compared to other machines.

Applications of WIRE-CUT EDM

- Production of prototypes
- Small series of spare parts, turbine blades, aerospace parts etc.
- Stamping dies, drawing and Extrusion tools, molding dies.
- Sintering dies, blanking dies, spark erosion, electrodes.

Conclusion of a very fruitful visit to IGTR

The visit was fruitful, and would help us in connecting the theoretical study in class with the practical applications of various tooling and machining processes used in industry. The visit also motivated us in many ways. We are excited to have more such industrial visits, field visits, internships, taking industrial projects, and take more of practical works including workshops on various concepts. Overall, we got a new viewpoint of approaching the same problem, and an experience we won't forget for their lifetime. We also have got some very exciting new ideas for the projects we are going to prepare in future based on various concepts, loopholes existing in the concepts, new and a fine-tuned approach for the same thing and the likes.

No. of faculty: 02

Faculty coordinator: Prof. S.N.Dhole, Prof. Md.Irfan.

Introduction

The college has arranged Industrial visit for Management students to study in Kalash seeds Pvt.Ltd. Vegetable seed sowing, growing, and doing research & Kalika Steel Alloy Pvt. Ltd TMT Bar Manufacturing with advance Rolling mills & Leading Machinery. The visit was organized with the prior permission and guidance of HON. Principal Dr. S. K. Biradar and Head of Management Department, Prof. Md.Irfan.

Industrial visit is a vital part of curriculum. It bridges classroom learning and real working worlds. The visit provides knowledge about the organizational structures and modes of operation in different industries.

OBJECTIVES OF INDUSTRIAL VISIT

- 1) To Know the Information about Vegetable seed sowing, growing
- 2) To understand the research & Marketing
- 3) Knowing about TMT Bar Manufacturing with advance Rolling mills & Leading Machinery

About Kalash Seeds Pvt. Ltd. Jalna M.S.

- Kalash Seeds Pvt Ltd is a leading seed company in India doing Research & Marketing in tropical vegetable
- Presently among top 5 Companies in India in vegetable seeds industry
- Recently started focusing on SAARC countries
- Our sister concern Beej Sheetal is active in Research since the last 30 years
- There is steady growth of turnover as the research products are giving very good results in the market.
- In Indian Vegetable Seed market, Kalash has already achieved market leadership in chili, pumpkin, beetroot, onion, broccoli, muskmelon

About Kalika Steel Alloy Pvt. Ltd. Jalna M.S.

Established in 2003, Kalika has grown to be known as one of the best brands with world-class infrastructure and a fully automated plant equipped with superior Primetal Technology (SIEMENS-VAI). Founded on the strong principles of integrity, transparency, and excellence, Kalika has consistently delivered the finest quality to its customers and created a positive, productive environment for employees with environment-friendly practices. With sheer dedication and a constant need for self-improvement, Kalika has always challenged the standards and invested in practices that lead to exemplary work.

The mechanical properties of bars are tested through — Section Weight: 'Weight per Meter' of the bars as per IS: 1786:2008 is checked by taking out sample after every thirty minutes. Standards weight is always maintained within BIS tolerance.

Load Test : Yield Load, Ultimate Tensile Load and Elongation are tested using UTM of 100 Ton capacity.

Bend Test: as per sizes specified in IS code, the bend test is carried out by bending the bars on mandrel.

Re-bend Test: Bars are bent at an angel of 1350C, kept in boiling water at 1 000C for 30 minutes and then bent back at an of 1 57.50 C

After all these tests, lot-wise tagging, packing, storage, and dispatch of the material start.
